# Subject Index

## Volume 9

### Afforestation; see Forests

### Air temperature

Butterfly response to microclimatic conditions following ponderosa pine restoration (Meyer and Sisk), 453

Microclimatic changes induced by ecological restoration of ponderosa pine forest in northern Arizona (Meyer et al), 443

### Algae

Soil algae in brown coal and lignite post-mining areas in central Europe (Czech Republic and Germany) (Lukešová), 341

### Animals

Design and implementation of monitoring studies to evaluate the success of ecological restoration on wildlife (Block et al), 293

Estimating the effects of beach nourishment on *Caretta caretta* (loggerhead sea turtle) nesting (Rumbold et al), 304

Introduction: concepts of wildlife and wildlife habitat for ecological restoration (Morrison), 251

Linking habitat restoration to meaningful units of animal demography (Smallwood), 253

The need for strategic planning in passive restoration of wildlife populations (Scott et al), 262

Spatial and temporal considerations in restoring habitat for wildlife (George and Zack), 272

### Arizona

Butterfly response to microclimatic conditions following ponderosa pine restoration (Meyer and Sisk), 453

Microclimatic changes induced by ecological restoration of ponderosa pine forest in northern Arizona (Meyer et al), 443

### Arthropods

Spiders and other arthropods as indicators in old-growth versus logged redwood stands (Willet), 410

### Beaches

Estimating the effects of beach nourishment on *Caretta caretta* (loggerhead sea turtle) nesting (Rumbold et al), 304

### Birds

Restoration of fragmented landscapes for the conservation of birds: a general framework and specific recommendations for urbanizing landscapes (Marzluff and Ewing), 280

Restoration of wetlands from abandoned rice fields for nutrient removal, and biological community and landscape diversity (Comín et al), 201

### Bluebunch wheatgrass

Influence of nutrient availability on the interaction between spotted knapweed and bluebunch wheatgrass (Herron et al), 326

### Book reviews

*A Case for Wetland Restoration*, by Hey and Phillippi (Middleton), 247

*Landscape Restoration Handbook, Second Edition*, by Harker et al (Cook), 111

*Precious Heritage: The Status of Biodiversity in the United States*, edited by Stein et al (Noss), 476

*Prescribed Burning in California Wildlands Vegetation Management*, by Biswell (Shaffer), 475

*Repairing Damaged Wildlands: A Process-Oriented, Landscape-Scale Approach*, by Whisenant (Whitford), 249

*Wetland Restoration, Flood Pulsing, and Disturbance Dynamics*, by Middleton (Sparks), 112

### Bottomlands

Achieving restoration success: myths in bottomland hardwood

forests (Stanturf et al), 189

### Bracken litter

The use of mixtures of sulfur and bracken litter to reduce pH of former arable soils and control ruderal species (Owen and Marrs), 397

### Brown coal mining; see Coal mining

### Butterflies

Butterfly response to microclimatic conditions following ponderosa pine restoration (Meyer and Sisk), 453

Does extensive grazing benefit butterflies in coastal dunes? (Wallis-DeVries and Raemakers), 179

### California

Determining the pattern of oak woodland regeneration for a cleared watershed in northwest California: a necessary first step for restoration (Brooks and Merenlender), 1

Effects of established perennial grasses on introduction of native forbs in California (Brown and Bugg), 38

Soil water retention on gold mine surfaces in the Mojave Desert (Walker and Powell), 95

### Carbon

Microbial biomass-c in reclaimed soil of the Rhineland (Germany) and the north Bohemian lignite mining areas (Czech Republic): measured and predicted values (Růžek et al), 370

### *Caretta caretta*

Estimating the effects of beach nourishment on *Caretta caretta* (loggerhead sea turtle) nesting (Rumbold et al), 304

### Chalk grasslands

Problems, approaches, and results in restoration of Dutch calcareous grassland during the last 30 years (Willems), 147

### *Cirsio-Molinietum*

Restoration of a *Cirsio-Molinietum* fen meadow on an agriculturally improved pasture (Tallowin and Smith), 167

***Cirsium pitcheri***

Restoration ecology of an endangered plant species: establishment of new populations of *Cirsium pitcheri* (Rowland and Maun), 60

**Coal mining**

Colonization of colliery spoil heaps by millipedes (Diplopoda) and terrestrial isopods (Oniscidea) in the Sokolov Region, Czech Republic (Tajovský), 365

Earthworm succession in afforested colliery spoil heaps in the Sokolov Region, Czech Republic (Pižl), 359

Microbial biomass-c in reclaimed soil of the Rhineland (Germany) and the north Bohemian lignite mining areas (Czech Republic): measured and predicted values (Růžek et al), 370

Soil algae in brown coal and lignite post-mining areas in central Europe (Czech Republic and Germany) (Lukešová), 341

**Coastal dunes**

Does extensive grazing benefit butterflies in coastal dunes? (WallisDeVries and Raemakers), 179

**Colliery spoil heaps**

Colonization of colliery spoil heaps by millipedes (Diplopoda) and terrestrial isopods (Oniscidea) in the Sokolov Region, Czech Republic (Tajovský), 365

Earthworm succession in afforested colliery spoil heaps in the Sokolov Region, Czech Republic (Pižl), 359

**Common reed**

Common reed *Phragmites australis*: control and effects upon biodiversity in freshwater nontidal wetlands (Ailstock et al), 49

**Conceptual frameworks**

Restoration ecology: repairing the Earth's ecosystems in the new millennium (Hobbs and Harris), 239

**Coral reefs**

Strategies for gardening denuded coral reef areas: the applicability of using different types of coral material for reef restoration (Epstein et al), 432

**Correction**

Does extensive grazing benefit butterflies in coastal dunes? (WallisDeVries and Raemakers) (2001; 9:179), 478

**Cyanobacteria**

Soil algae in brown coal and lignite post-mining areas in central Europe (Czech Republic and Germany) (Lukešová), 341

**Czech Republic**

Colonization of colliery spoil heaps by millipedes (Diplopoda) and terrestrial isopods (Oniscidea) in the Sokolov Region, Czech Republic (Tajovský), 365

Earthworm succession in afforested colliery spoil heaps in the Sokolov Region, Czech Republic (Pižl), 359

Ecology of post-mining landscapes (Hüttel and Bradshaw), 339

Microbial biomass-c in reclaimed soil of the Rhineland (Germany) and the north Bohemian lignite mining areas (Czech Republic): measured and predicted values (Růžek et al), 370

Soil algae in brown coal and lignite post-mining areas in central Europe (Czech Republic and Germany) (Lukešová), 341

Soil microfungi in two post-mining chronosequences with different vegetation types (Nováková), 351

**Demography**

Linking habitat restoration to meaningful units of animal demography (Smallwood), 253

**Deserts**

Soil water retention on gold mine surfaces in the Mojave Desert (Walker and Powell), 95

**Dunes**

Does extensive grazing benefit butterflies in coastal dunes? (WallisDeVries and Raemakers), 179

Restoration of wet dune slacks on the Dutch Wadden Sea Islands: recolonization after large-scale sod cutting (Grootjans et al), 137

**Dutch Wadden Sea Islands**

Restoration of wet dune slacks on the Dutch Wadden Sea Islands:

recolonization after large-scale sod cutting (Grootjans et al), 137

**Earthworms**

Earthworm succession in afforested colliery spoil heaps in the Sokolov Region, Czech Republic (Pižl), 359

**Ecological restoration; see Restoration ecology****Endangered species**

Restoration ecology of an endangered plant species: establishment of new populations of *Cirsium pitcheri* (Rowland and Maun), 60

**Erratum**

Does extensive grazing benefit butterflies in coastal dunes? (WallisDeVries and Raemakers) (2001; 9:179), 478

**Ethics**

Valuation of nature in conservation and restoration (Swart et al), 230

**Fen species**

Restoration of a *Cirsio-Molinietum* fen meadow on an agriculturally improved pasture (Tallowin and Smith), 167

Restoration of wet fen meadows by topsoil removal: vegetation development and germination biology of fen species (Patzelt et al), 127

**Fertilizers**

Shrubland restoration following woody alien invasion and mining: effects of topsoil depth, seed source, and fertilizer addition (Holmes), 71

**Fire**

Modeling ecological restoration effects on ponderosa pine forest structure (Covington et al), 421

**Florida**

Effects of hardwood reduction techniques on longleaf pine sandhill vegetation in northwest Florida (Provencher et al), 13

Herpetofaunal responses to restoration treatments of longleaf pine sandhills in Florida (Litt et al), 462

**Forbs**

Effects of established perennial grasses on introduction of native

- forbs in California (Brown and Bugg), 38
- Forests**
- Achieving restoration success: myths in bottomland hardwood forests (Stanturf et al), 189
  - Butterfly response to microclimatic conditions following ponderosa pine restoration (Meyer and Sisk), 453
  - Comparing the importance of seedbed and canopy type in the restoration of upland *Thuja occidentalis* forests of northeastern Minnesota (Cornett et al), 386
  - Determining the pattern of oak woodland regeneration for a cleared watershed in northwest California: a necessary first step for restoration (Brooks and Merenlender), 1
  - Earthworm succession in afforested colliery spoil heaps in the Sokolov Region, Czech Republic (Pižl), 359
  - Ecological restoration of native forest at Aratitia, North Island, New Zealand (Smale et al), 28
  - Microclimatic changes induced by ecological restoration of ponderosa pine forest in northern Arizona (Meyer et al), 443
  - Modeling ecological restoration effects on ponderosa pine forest structure (Covington et al), 421
  - Spiders and other arthropods as indicators in old-growth versus logged redwood stands (Willett), 410
- Fungi**
- Soil microfungi in two post-mining chronosequences with different vegetation types (Nováková), 351
- Germany**
- Ecology of post-mining landscapes (Hüttel and Bradshaw), 339
  - Microbial biomass-c in reclaimed soil of the Rhineland (Germany) and the north Bohemian lignite mining areas (Czech Republic): measured and predicted values (Růžek et al), 370
  - Soil algae in brown coal and lignite post-mining areas in central Europe (Czech Republic and Germany) (Lukešová), 341
- Soil microfungi in two post-mining chronosequences with different vegetation types (Nováková), 351
- Some remarks on the socio-cultural background of restoration ecology (Pfadenhauer), 220
- Gold mining**
- Soil water retention on gold mine surfaces in the Mojave Desert (Walker and Powell), 95
- Granite quarries**
- Ecological and landscape rehabilitation of a quarry site in Hong Kong (Jim), 85
- Grasses**
- Common reed *Phragmites australis*: control and effects upon biodiversity in freshwater nontidal wetlands (Ailstock et al), 49
  - Effects of established perennial grasses on introduction of native forbs in California (Brown and Bugg), 38
  - Genetic polymorphism and transplantation success in the Mediterranean seagrass *Posidonia oceanica* (Procaccini and Piazzini), 332
  - A germination and establishment field trial of *Themeda australis* (Kangaroo grass) for mine site restoration in the Central Tablelands of New South Wales (Windson and Clements), 104
  - Influence of nutrient availability on the interaction between spotted knapweed and bluebunch wheatgrass (Herron et al), 326
- Grasslands**
- Problems, approaches, and results in restoration of Dutch calcareous grassland during the last 30 years (Willems), 147
- Grazing**
- Does extensive grazing benefit butterflies in coastal dunes? (WallisDeVries and Raemakers), 179
- Habitat**
- Design and implementation of monitoring studies to evaluate the success of ecological restoration on wildlife (Block et al), 293
  - Does extensive grazing benefit butterflies in coastal dunes? (WallisDeVries and Raemakers), 179
  - Herpetofaunal responses to restoration treatments of longleaf pine sandhills in Florida (Litt et al), 462
  - Introduction: concepts of wildlife and wildlife habitat for ecological restoration (Morrison), 251
  - Linking habitat restoration to meaningful units of animal demography (Smallwood), 253
  - The need for strategic planning in passive restoration of wildlife populations (Scott et al), 262
  - Restoration of fragmented landscapes for the conservation of birds: a general framework and specific recommendations for urbanizing landscapes (Marzluff and Ewing), 280
  - Spatial and temporal considerations in restoring habitat for wildlife (George and Zack), 272
- Herpetofaunal community**
- Herpetofaunal responses to restoration treatments of longleaf pine sandhills in Florida (Litt et al), 462
- Hong Kong**
- Ecological and landscape rehabilitation of a quarry site in Hong Kong (Jim), 85
- International Conference**
- Achieving restoration success: myths in bottomland hardwood forests (Stanturf et al), 189
  - Degraded softwater lakes: possibilities for restoration (Brouwer and Roelofs), 155
  - Does extensive grazing benefit butterflies in coastal dunes? (WallisDeVries and Raemakers), 179
  - Ecological restoration: state of the art or state of the science? (van Diggelen et al), 115
  - Establishment of transplants on machine-graded ski runs above timberline in the Swiss Alps (Fattorini), 119
  - Problems, approaches, and results in restoration of Dutch calcareous grassland during the last 30 years (Willems), 147
  - Restoration ecology: repairing the

- Earth's ecosystems in the new millennium (Hobbs and Harris), 239
- Restoration of a *Cirsio-Molinietum* fen meadow on an agriculturally improved pasture (Tallowin and Smith), 167
- Restoration of natural and semi-natural wetland systems in Central Europe: progress and predictability of developments (Klötzli and Grootjans), 209
- Restoration of wet dune slacks on the Dutch Wadden Sea Islands: recolonization after large-scale sod cutting (Grootjans et al), 137
- Restoration of wet fen meadows by topsoil removal: vegetation development and germination biology of fen species (Patzelt et al), 127
- Restoration of wetlands from abandoned rice fields for nutrient removal, and biological community and landscape diversity (Comín et al), 201
- Some remarks on the socio-cultural background of restoration ecology (Pfadenhauer), 220
- Valuation of nature in conservation and restoration (Swart et al), 230
- Islands**
- Restoration of wet dune slacks on the Dutch Wadden Sea Islands: recolonization after large-scale sod cutting (Grootjans et al), 137
- Kangaroo grass**
- A germination and establishment field trial of *Themeda australis* (Kangaroo grass) for mine site restoration in the Central Tablelands of New South Wales (Windor and Clements), 104
- Lakes**
- Degraded softwater lakes: possibilities for restoration (Brouwer and Roelofs), 155
- Lead**
- Soil seed bank as an input of seed source in revegetation of lead/zinc mine tailings (Zhang et al), 378
- Light intensity**
- Butterfly response to microclimatic conditions following ponderosa pine restoration (Meyer and Sisk), 453
- Microclimatic changes induced by ecological restoration of ponderosa pine forest in northern Arizona (Meyer et al), 443
- Lignite mining**
- Microbial biomass-c in reclaimed soil of the Rhineland (Germany) and the north Bohemian lignite mining areas (Czech Republic): measured and predicted values (Růžek et al), 370
- Soil algae in brown coal and lignite post-mining areas in central Europe (Czech Republic and Germany) (Lukešová), 341

Ecological restoration of native forest at Aratiatia, North Island, New Zealand (Smale et al), 28
- Niagara Falls**  
Natural recovery and restoration potential of severely disturbed talus vegetation at Niagara Falls: assessment using a reference system (de Gruchy et al), 311
- Nitrogen**  
Influence of nutrient availability on the interaction between spotted knapweed and bluebunch wheatgrass (Herron et al), 326
- Oak trees**  
Determining the pattern of oak woodland regeneration for a cleared watershed in northwest California: a necessary first step for restoration (Brooks and Merenlender), 1
- pH**  
The use of mixtures of sulfur and bracken litter to reduce pH of former arable soils and control ruderal species (Owen and Marrs), 397
- Phosphorus**  
Influence of nutrient availability on the interaction between spotted knapweed and bluebunch wheatgrass (Herron et al), 326
- Phragmites australis**  
Common reed *Phragmites australis*: control and effects upon biodiversity in freshwater nontidal wetlands (Ailstock et al), 49
- Pine trees**  
Butterfly response to microclimatic conditions following ponderosa pine restoration (Meyer and Sisk), 453  
Effects of hardwood reduction techniques on longleaf pine sandhill vegetation in northwest Florida (Provencher et al), 13  
Herpetofaunal responses to restoration treatments of longleaf pine sandhills in Florida (Litt et al), 462  
Microclimatic changes induced by ecological restoration of ponderosa pine forest in northern Arizona (Meyer et al), 443  
Modeling ecological restoration effects on ponderosa pine forest structure (Covington et al), 421
- Plants**  
Influence of nutrient availability on the interaction between spotted knapweed and bluebunch wheatgrass (Herron et al), 326  
Restoration ecology of an endangered plant species: establishment of new populations of *Cirsium pitcheri* (Rowland and Maun), 60
- Ponderosa pine trees**  
Butterfly response to microclimatic conditions following ponderosa pine restoration (Meyer and Sisk), 453  
Microclimatic changes induced by ecological restoration of ponderosa pine forest in northern Arizona (Meyer et al), 443  
Modeling ecological restoration effects on ponderosa pine forest structure (Covington et al), 421
- Posidonia oceanica**  
Genetic polymorphism and transplantation success in the Mediterranean seagrass *Posidonia oceanica* (Procaccini and Piazzini), 332
- Prairie**  
Effects of established perennial grasses on introduction of native forbs in California (Brown and Bugg), 38
- Quarries**  
Ecological and landscape rehabilitation of a quarry site in Hong Kong (Jim), 85
- Redwood trees**  
Spiders and other arthropods as indicators in old-growth versus logged redwood stands (Willett), 410
- Restoration ecology**  
Ecological restoration: state of the art or state of the science? (van Diggelen et al), 115  
Restoration ecology: repairing the Earth's ecosystems in the new millennium (Hobbs and Harris), 239  
Some remarks on the socio-cultural background of restoration ecology (Pfadenhauer), 220  
Valuation of nature in conservation and restoration (Swart et al), 230
- Rice**  
Restoration of wetlands from abandoned rice fields for nutrient removal, and biological community and landscape diversity (Comín et al), 201
- Sandhills**  
Effects of hardwood reduction techniques on longleaf pine sandhill vegetation in northwest Florida (Provencher et al), 13  
Herpetofaunal responses to restoration treatments of longleaf pine sandhills in Florida (Litt et al), 462
- Seagrasses**  
Genetic polymorphism and trans-

- plantation success in the Mediterranean seagrass *Posidonia oceanica* (Procaccini and Piazzì), 332
- Seedbeds**  
Comparing the importance of seedbed and canopy type in the restoration of upland *Thuja occidentalis* forests of northeastern Minnesota (Cornett et al), 386
- Seeds**  
Effects of established perennial grasses on introduction of native forbs in California (Brown and Bugg), 38  
A germination and establishment field trial of *Themeda australis* (Kangaroo grass) for mine site restoration in the Central Tablelands of New South Wales (WindSOR and Clements), 104

Establishment of transplants on machine-graded ski runs above timberline in the Swiss Alps (Fattorini), 119
- Symposium**  
Colonization of colliery spoil heaps by millipedes (Diplopoda) and terrestrial isopods (Oniscidea) in the Sokolov Region, Czech Republic (Tajovský), 365  
Earthworm succession in afforested colliery spoil heaps in the Sokolov Region, Czech Republic (Pižl), 359  
Ecology of post-mining landscapes (Hüttel and Bradshaw), 339  
Microbial biomass-c in reclaimed soil of the Rhineland (Germany) and the north Bohemian lignite mining areas (Czech Republic): measured and predicted values (Růžek et al), 370  
Soil algae in brown coal and lignite post-mining areas in central Europe (Czech Republic and Germany) (Lukešová), 341  
Soil microfungi in two post-mining chronosequences with different vegetation types (Nováková), 351
- Talus slope**  
Natural recovery and restoration potential of severely disturbed talus vegetation at Niagara Falls:

assessment using a reference system (de Gruchy et al), 311

### Terrestrial isopods

Colonization of colliery spoil heaps by millipedes (Diplopoda) and terrestrial isopods (Oniscidea) in the Sokolov Region, Czech Republic (Tajovský), 365

### *Themeda australis*

A germination and establishment field trial of *Themeda australis* (Kangaroo grass) for mine site restoration in the Central Tablelands of New South Wales (Windor and Clements), 104

### *Thuja occidentalis*

Comparing the importance of seedbed and canopy type in the restoration of upland *Thuja occidentalis* forests of northeastern Minnesota (Cornett et al), 386

### Topsoil; see Soil

### Transplantation

Establishment of transplants on machine-graded ski runs above timberline in the Swiss Alps (Fattorini), 119

Genetic polymorphism and transplantation success in the Mediterranean seagrass *Posidonia oceanica* (Procaccini and Piazzini), 332

### Trees

Achieving restoration success: myths in bottomland hardwood forests (Stanturf et al), 189

Butterfly response to microclimatic conditions following ponderosa pine restoration (Meyer and Sisk), 453

Comparing the importance of seedbed and canopy type in the restoration of upland *Thuja occidentalis* forests of northeastern Minnesota (Cornett et al), 386

Determining the pattern of oak woodland regeneration for a cleared watershed in northwest California: a necessary first step for restoration (Brooks and Merenlender), 1

Ecological restoration of native forest at Aratiatia, North Island, New Zealand (Smale et al), 28

Effects of hardwood reduction tech-

niques on longleaf pine sandhill vegetation in northwest Florida (Provencher et al), 13

Herpetofaunal responses to restoration treatments of longleaf pine sandhills in Florida (Litt et al), 462

Microclimatic changes induced by ecological restoration of ponderosa pine forest in northern Arizona (Meyer et al), 443

Modeling ecological restoration effects on ponderosa pine forest structure (Covington et al), 421

Spiders and other arthropods as indicators in old-growth versus logged redwood stands (Willett), 410

### Turtles

Estimating the effects of beach nourishment on *Caretta caretta* (loggerhead sea turtle) nesting (Rumbold et al), 304

### Urbanization

Restoration of fragmented landscapes for the conservation of birds: a general framework and specific recommendations for urbanizing landscapes (Marzluff and Ewing), 280

### Valuation of nature

Valuation of nature in conservation and restoration (Swart et al), 230

### Vapor pressure deficit

Butterfly response to microclimatic conditions following ponderosa pine restoration (Meyer and Sisk), 453

Microclimatic changes induced by ecological restoration of ponderosa pine forest in northern Arizona (Meyer et al), 443

### Vegetation

Influence of nutrient availability on the interaction between spotted knapweed and bluebunch wheatgrass (Herron et al), 326

Natural recovery and restoration potential of severely disturbed talus vegetation at Niagara Falls: assessment using a reference system (de Gruchy et al), 311

Restoration ecology of an endangered plant species: establishment

of new populations of *Cirsium pitcheri* (Rowland and Maun), 60

Restoration of natural and seminatural wetland systems in Central Europe: progress and predictability of developments (Klötzli and Grootjans), 209

### Water

Degraded softwater lakes: possibilities for restoration (Brouwer and Roelofs), 155

Soil water retention on gold mine surfaces in the Mojave Desert (Walker and Powell), 95

### Wetlands

Achieving restoration success: myths in bottomland hardwood forests (Stanturf et al), 189

Common reed *Phragmites australis*: control and effects upon biodiversity in freshwater nontidal wetlands (Ailstock et al), 49

Restoration of natural and seminatural wetland systems in Central Europe: progress and predictability of developments (Klötzli and Grootjans), 209

Restoration of wetlands from abandoned rice fields for nutrient removal, and biological community and landscape diversity (Comín et al), 201

### Wildlife

Design and implementation of monitoring studies to evaluate the success of ecological restoration on wildlife (Block et al), 293

Estimating the effects of beach nourishment on *Caretta caretta* (loggerhead sea turtle) nesting (Rumbold et al), 304

Introduction: concepts of wildlife and wildlife habitat for ecological restoration (Morrison), 251

Linking habitat restoration to meaningful units of animal demography (Smallwood), 253

The need for strategic planning in passive restoration of wildlife populations (Scott et al), 262

Restoration of fragmented landscapes for the conservation of birds: a general framework and specific recommendations for

urbanizing landscapes (Marzluff and Ewing), 280  
 Restoration of wetlands from abandoned rice fields for nutrient removal, and biological community and landscape diversity (Comín et al), 201

Spatial and temporal considerations in restoring habitat for wildlife (George and Zack), 272  
**Woodlands; see Forests**  
**Worms**  
 Earthworm succession in afforested colliery spoil heaps in the

Sokolov Region, Czech Republic (Pižl), 359  
**Zinc**  
 Soil seed bank as an input of seed source in revegetation of lead/zinc mine tailings (Zhang et al), 378

## STATEMENT OF OWNERSHIP, MANAGEMENT, AND CIRCULATION (Required by 39 U.S.C. 3685)

1. Publication Title  
 Restoration Ecology

2. Publication No.  
 15-115

3. Filing Date  
 9/15/2001

4. Issue Frequency  
 Quarterly

5. No. of Issues Published Annually  
 4

6. Annual Subscription Price  
 \$ 120.00 Individual  
 \$ 245.00 Institutional

7. Complete Mailing Address Of Known Office of Publication (Street, City, County, State, and ZIP+4) (Not Printer)  
 Blackwell Science Inc, Commerce Place, 350 Main Street, Malden, MA 02148-5018

8. Complete Mailing Address of Headquarters or General Business Office of Publisher (Not Printer)  
 Blackwell Science Inc, Commerce Place, 350 Main Street, Malden, MA 02148-5018

9. Full Names and Complete Mailing Addresses of Publisher, Editor, and Managing Editor (Do Not Leave Blank)  
 Publisher (Name and Complete Mailing Address)

Blackwell Science, Inc.  
 Commerce Place, 350 Main Street  
 Malden MA 02148-5018

Editor (Name and Complete Mailing Address)  
 Edith B Allen  
 Department of Botany & Plant Science  
 University of California, Riverside  
 Batchelor Hall 2132  
 Riverside CA 92521-0124

Managing Editor (Name and Complete Mailing Address)  
 Sheila N Kee  
 Department of Botany & Plant Science  
 University of California, Riverside  
 Batchelor Hall 2132  
 Riverside CA 92521-0124

10. Owner (If owned by a corporation, its name and address must be stated and also immediately thereafter the names and addresses of stockholders owning or holding 1 percent or more of the total amount of stock. If not owned by a corporation, the names and addresses of individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address as well as that of each individual must be given. If the publication is published by a nonprofit organization, its name and address must be stated.) (Do not leave blank.)

Full Name and Address  
 Society of Ecological Restoration  
 1955 West Grant Road #150  
 Tucson AZ 85745

11. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of the Total Amount of Bonds, Mortgages, or Other Securities. If none, check here. ☒ None
